Forward Looking Statements
These materials include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, “outlook”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs. The Company continues to distinguish between outlook and guidance in forward looking statements. Guidance statements are a risk-weighted assessment constituting Newcrest’s current expectation as to the range in which its gold production in the current financial year will ultimately fall. Outlook statements are a risk-weighted assessment constituting Newcrest’s current view regarding the possible range of gold production in years subsequent to the current financial year.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the company or management or beyond the Company’s control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant securities exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
Disclaimer

Ore Reserves and Mineral Resources Reporting Requirements
As an Australian company with securities listed on the Australian Securities Exchange (“ASX”), Newcrest is subject to Australian disclosure requirements and standards, including the requirements of the Corporations Act and the ASX. Investors should note that it is a requirement of the ASX listing rules that the reporting of ore reserves and mineral resources in Australia comply with the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the “JORC Code”) and that Newcrest’s ore reserve and mineral resource estimates comply with the JORC Code.

Competent Person’s Statement
The information in this release that relates to Mineral Resources or Ore Reserves has been extracted from the release titled “Annual Mineral Resources and Ore Reserves Statement – 31 December 2015” dated 15 February 2016 (the original release). Newcrest confirms that it is not aware of any new information or data that materially affects the information included in the original release and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the original release continue to apply and have not materially changed. Newcrest confirms that the form and context in which the competent person’s findings are presented have not been materially modified from the original release.

Non-IFRS Financial Information
This presentation is a summary document and should be read in conjunction with the Appendix 4D on the ASX platform. Newcrest results are reported under International Financial Reporting Standards (IFRS) including EBIT (earnings before interest, tax and significant items) and EBITDA (earnings before interest, tax, depreciation and amortisation and significant items) which are used to measure segment performance. This presentation also includes certain non-IFRS financial information including Underlying profit (profit after tax before significant items attributable to owners of the parent company), All-In Sustaining Cost (determined in accordance with the World Gold Council Guidance Note on Non-GAAP Metrics released June 2013), AISC Margin (realised gold price less AISC per ounce sold (where expressed as USD), or realised gold price less AISC per ounce sold divided by realised gold price (where expressed as a %)) Interest Coverage Ratio (EBITDA/Interest payable for the relevant period), Free cash flow (cash flow from operating activities less cash flow related to investing activities), EBITDA margin (EBITDA expressed as a percentage of revenue) and EBIT margin (EBIT expressed as a percentage of revenue). These measures are used internally by management to assess the performance of the business and make decisions on the allocation of resources and are included in this presentation to provide greater understanding of the underlying performance of Newcrest’s operations. When reviewing business performance, this non-IFRS information should be used in addition to, and not as a replacement of, measures prepared in accordance with IFRS. The non-IFRS information has not been subject to audit or review by Newcrest’s external auditor. Newcrest Group All-In Sustaining Costs will vary from period to period as a result of various factors including production performance, timing of sales, the level of sustaining capital and the relative contribution of each asset. Reconciliations of non-IFRS measures to the most appropriate IFRS measure are included on slides 40 and 41 of this presentation.

Historical USD figures
Comparative financial information included in this presentation, previously reported in AUD has been restated into USD. Further details of the restatement process are provided in the ASX Appendix 4D Half Year Financial Report released 15 February 2016 and the Market Release of 17 December 2015.
Update on rescue effort

Kencana underground mine, Gosowong, Indonesia

Failure zone

Location of trapped miner
Update on rescue effort

- 8 February - ~8:30pm local time a geotechnical event occurred
- Mine evacuated – Pak Mursalim Sahman trapped
- Three levels of crisis management team immediately established and global expertise accessed
- 9 February - contact made with Pak Mursalim
- 10 February – first life support drill hole established
- 11 February – second life support hole established
- 12 February – Work commences on large diameter bore hole
- 14 February – Large diameter bore hole reached chamber
- 15 February – Work continues on lining bore hole

Safety – Three focus areas

Our safety vision
Everybody going home safe and healthy every day

Measure of success
Zero fatalities and life-changing injuries

1. Build a stronger safety culture through NewSafe
2. Critical controls for every high-risk task
3. Robust process safety management

Supported by the right systems and tools
Half Year FY16 Summary

- Statutory profit\(^1\) USD 81m and Underlying profit\(^2\) USD 63m
- Free cash flow\(^2\) of USD 254m
- Net debt reduction of USD 235m from 30 June 2015
- Gold production up 6% half-on-half to 1.2Moz
- Copper production down 23% half-on-half to 39kt
- EBITDA margin\(^2\) of 35%
- 5% lower All-In Sustaining Cost\(^2\) of USD 770/oz (delivering an AISC margin\(^2\) of 31%)
- Newcrest moved to USD reporting

---

\(^1\) Difference between Statutory profit and Underlying profit is profit of USD 18m on disposal of Newcrest’s remaining holding in Evolution Mining Limited

\(^2\) Refer to slide 3 “Non-IFRS Financial Information”
Lihir – Focus on operational improvements starting to deliver

**H1 FY16 operational overview**

- AISC of USD 890/oz for H1 FY16 (28% improvement period on period)
- Production increase of 37% half-on-half
- Achieved 12.4 mtpa grinding throughput rate in December 2015 quarter
- Targeting 13 mtpa sustainable grinding throughput rate by end of December 2016
- Require consistent rainfall to avoid impacting production

**Annualised grinding throughput by quarter (mt)**

Refer to slide 3 “Non-IFRS Financial Information”

2 Subject to operating and market conditions and no unforeseen circumstances occurring. Refer to slide 2 “Forward Looking Statements”

3 This should not be construed as production guidance from the Company now or in the future. Potential production and throughput rates are subject to a range of contingencies which may affect performance
Lihi – Breaking the reactive maintenance cycle

Improving the maintenance cycle

- ‘Runtime’ (or availability) has been a key focus
- Have successfully improved planned v unplanned maintenance
- Scope for even more improvement = further realisation of potential
Lihir – Water initiatives being implemented

Rainfall at Upper Londolovit¹
Monthly average (mm)

Average rain/month (2010 - 2014) vs. 2015

Water Usage²,³
Cubic metres per hour

- **Available Water**³: 3,700
- **12mtpa (prior to action)**: 1,300
- **12mtpa (current operation)**: 2,300

Key water saving improvements include:
- Use of sea water where safe to do so
- Reduction in wash water
- Harvesting additional water (e.g. from flotation tails thickener)

¹ Based on Upper Londolovit gauging station
² Refer to slide 2 “Forward Looking Statements”. Figures are approximate as there can be a number of influencing variables
³ Includes consideration of Newcrest’s operating licence conditions

**H1 FY16 operational overview**

- Fatality in September 2015
- Gold and copper production impacted by main SAG Mill motor issue
- SAG mill repaired and bypass built to mitigate impact of any future mill outages
- Achieved 24.3 mtpa annualised throughput rate in December 2015
- Lower copper prices adversely impacted AISC per ounce

1 Refer to slide 3 “Non-IFRS Financial Information”
Cadia – Transitioning to Cadia East

Panel Cave 2 undercut progressing as planned

Early stages of Panel Cave 1 interaction with Panel Cave 2 progressing in accordance with cave management plan

Ridgeway scheduled to be on care and maintenance from 3 March 2016

Significant reduction in site workforce occurring with Ridgeway being placed on care and maintenance

Permit to increase processing capacity to 32 mtpa approved and targeting PFS completion by 30 June 2016

---

1 Rolling 12 month period end date specified in graph (i.e. March 2012 represents period 1 April 2011 to 31 March 2012)
2 See announcement dated 11 September 2015 titled “Permit granted to increase Cadia processing plant capacity”
Cadia – Update on Concentrator 1 SAG mill outage

• Following repairs, Concentrator 1 SAG Mill now operating at full capacity

• Will eventually require full rewind or replacement; currently assessing best option

• Bypass conveyor installed - will reduce impact of any future downtime (including planned maintenance)

• Excess stockpiles generated as a result of the SAG mill outage are expected to be largely processed by end of the current financial year

Refer to slide 2 “Forward Looking Statements”
Telfer – First half FY16 impacted by access to ore

H1 FY16 Operational overview

- Waste stripping continues on stages 6 / 7 of Main Dome
- AISC per oz was impacted by:
  - constraints on open pit and underground activity reducing ore grade to the mill
  - increased production stripping expenditure
  - lower by-product credits
- Indigenous Land Use Agreement signed between Newcrest and the Martu people in December 2015
  - confirms current arrangements and provides certainty to all parties
- Have transitioned to open pit contract mining with Macmahon (February 2016)

Refer to slide 3 “Non-IFRS Financial Information”
**H1 FY16 - Overview of other operations**

- **Bonikro**
  - Gold production: 1,099, 988, 574, 797 koz
  - AISC USD per ounce: 47, 48, 72, 74

- **Gosowong**
  - Gold production: 756, 794, 651, 737 koz
  - AISC USD per ounce: 172, 134, 197, 141

- **Hidden Valley**
  - Gold production: 1,287, 1,334, 1,535, 1,853 koz
  - AISC USD per ounce: 53, 49, 46, 28

- **Bonikro** pit on care and maintenance
- Accessing Hiré pit
- Improved grade
- Lower gold production due to lower tonnes from high-grade zones of Toguraci underground
- Tailings dam extension commenced
- Fatality in July 2015
- Unacceptable costs and cashflow
- Future strategic options being reviewed

---

1. All data relating to operations is shown as 100%, apart from Hidden Valley which is shown at Newcrest’s ownership percentage of 50%. Newcrest owns 75% of Gosowong through its holding in PT Nusa Halmahera Minerals, an incorporated joint venture, Bonikro includes mining and exploration interests in Côte d’Ivoire which are held by the following entities: LGL Mines CI SA (of which Newcrest owns 89.89%), LGL Exploration CI SA (of which Newcrest owns 100%) and LGL Resources CI SA (of which Newcrest owns 99.89%)

**Dividend**

No interim dividend declared, having regard to

- First half profitability
- Current market conditions
- Financial metric targets
- Near term focus remains on repaying debt

---

¹ Does not include a USD 50m PTNHM facility which was undrawn at each of the relevant dates
Three assets with life of 30+ Years

Sandeep Biswas
Managing Director and Chief Executive Officer
Lihir - New operating strategy unlocks lower capital option

**REVISED OPERATING STRATEGY**
- Sulphur removed as a constraint
- 12mtpa grinding throughput rate achieved
- 13mtpa\(^1\) grinding sustainable throughput rate target set 31 December 2016

**PIT OPTIMISATION**
- Changed from vertical to lateral
- Staged cooling and depressurisation
- Ex-pit & stockpile value based sequencing

**SEEPAGE BARRIER OPTION**
- Reduced capital expenditure
- Capital efficiency
- Risk mitigation

All underpinned by
- Improved engagement with local community
- Improved maintenance to deliver uptime and throughput
- Edge improvement projects focussed on costs and capital efficiency

---

1 Refer to slide 2 “Forward Looking Statements”. This should not be construed as production guidance from the Company now or in the future. Potential production and throughput rates are subject to a range of contingencies which may affect performance, subject to operating and market conditions and no unforeseen circumstances occurring.

</table>

1 Refer to slide 2 “Forward Looking Statements”. Estimates are from a prefeasibility study and as such are subject to an accuracy range of ±25%. Subject to further study, investment approval, receipt of all necessary permits and approvals and are subject to changes in market and operating conditions and engineering. Refer to slide 2 “Forward Looking Statements”. The numbers in the table above are estimates only and are likely to change
2 Includes sheeting material and crusher rehandle
3 Plant feed = Ex-pit + Stockpile feed
4 For the remaining Reserves and Resources please refer to Newcrest Annual Statement of Mineral Resources and Ore Reserves as at December 31 2015
Lihir – Engaging with the community

- Improved dialogue – group and one-on-one meetings
- Greater involvement of General Manager
- Tax Credit Scheme projects progressing
  - Lihir Secondary School completed
Lihir – Engaging with local companies

- Newcrest tenders major contracts
- Lihirian companies competed with international parties on safety, quality and price
- Four recent awards to Lihirian-based companies
Wafi-Golpu – Overview

Updated Wafi-Golpu prefeasibility study of December 2014 identified improved business case for the project by splitting it into two stages.

Stage One Feasibility and Stage Two Prefeasibility studies have been reviewed by the Boards of Harmony and Newcrest.

Commitment to major earthworks for access declines is dependant upon a Pre Mine Development Agreement with the Papua New Guinean Government and Board approval.

Resources and Reserves are as at 31 December 2015 and are shown for a 100% interest. Newcrest holds a 50% interest.

19 million^1

ounces
Wafi-Golpu – Stage One indicative timetable

1. Timeline is indicative based on the Stage One Feasibility Study and therefore subject to an accuracy range of minus ±15%, based on the information available.
2. Refer to slide 2 “Forward Looking Statements”
3. Concentrator expected to achieve 3mtpa approximately three months after BC1 first production.
Cadia – Prefeasibility Study to 32mtpa commenced

- Internal project team established
- PFS targeting completion by end FY16
- Options being explored
  - Increasing high pressure grinding rolls (HPGR) to be fed from either Coarse Ore Stockpile or HPGR Stockpile
  - Additional milling capacity
  - Investigating recovery improvement options (Vertimills)
- Future processing plant expansion potential beyond 32mtpa remains

1 Refer to slide 2 “Forward Looking Statements”
Exploration and early stage entry

- **Côte d’Ivoire**
  - **Indonesia**
  - **PNG**
  - **Fiji**
  - **New Zealand**

**Australia**
- **CDI**
  - Rebuild portfolio - property generation
  - Advance regional targets
  - HoA arrangements with junior exploration companies

**PNG**
- Wamum – Search for new discoveries
- MEJV target generation

**Fiji**
- Target generation

**New Zealand**
- Southern Coromandel JV - Epithermal search

**Exploration activity**

- **Nicaragua**
  - Topacio Farm-in at Oro Verde

Refer to slide 2 “Forward Looking Statements”
Ore Reserve update

Newcrest Gold Ore Reserve Changes 31 December 2015 (Moz)

Key drivers
- Impact of lower gold price assumption – down USD 50/oz to USD 1,200/oz
- Reduction in gold considered economically mineable:
  - Telfer Vertical Stockwork Corridor (0.5 Moz)
  - Bonikro Push-Back 5 (0.4 Moz)
- Hidden Valley pit redesign reduced gold reserves (0.7 Moz)
- Wafi-Golpu - Stage Two Prefeasibility Study reduced gold reserves by 0.7 Moz
- Cadia East - reconciliation of the cave shape achieved to date, reduced reserves by 0.7 Moz

Newcrest Copper Ore Reserve Changes 31 December 2015 (Mt)

Key drivers
- Wafi-Golpu – Stage Two Prefeasibility Study reduced copper reserves by 0.3 Mt
- Cadia East - reconciliation of the cave shape achieved to date, reduced reserves by 0.3 Mt

As per Newcrest Annual Statement of Mineral Resources and Ore Reserves as at December 31 2015. Mineral resources have remained unchanged at 140Moz gold and 20Mt copper (reported to two significant figures) since 31 December 2014.
Summary

Good H1 FY16 results

- All-In Sustaining Cost\(^1\) of USD 770/oz
- Free cash flow\(^1\) of USD 254m
- Net debt reduction of USD 235m

Near term organic growth

- Lihir Pit Optimisation Study - PFS complete
- Cadia East continued ramp-up

Longer term growth platform

- Wafi-Golpu a world class growth option – Stage One FS & Stage Two PFS
- Active exploration and early stage entry program

1 Refer to slide 3 “Non-IFRS Financial Information”
2 For the 6 months ended 31 December 2015 production and sales volumes include 778 gold ounces and 122 tonnes of copper related to the pre-commissioning and development of the Cadia East project. For the 6 months ended 31 December 2014, the comparable volumes were 17,728 gold ounces and 1,731 tonnes of copper. Expenditure associated with this production and revenue from the sales are capitalised and not included in the operating profit calculations.
3 Other includes rehabilitation accretion and amortisation and other costs categorised as sustaining.

As per Newcrest Annual Statement of Mineral Resources and Ore Reserves as at December 31 2015
Lihir – operating strategy

- Actively manage autoclave throughput based on sulphur content of feed to maximise gold production

**Microcrystalline pyrite** - appears more reactive and generally has higher gold content

**Crystalline (blocky) pyrite** - appears less reactive and generally has lower gold content

**Behaviour in autoclave:**
- Particle oxidises more rapidly, liberating gold relatively faster
- Gold on rim liberated first, but low grade, pyrite core takes substantially longer to oxidise

1 Shown for illustrative purposes, represent the end members of pyrite types
Newcrest maintains leading cost position

The data points represent each company’s performance for the 12 months to 30 September 2015. AISC data has been obtained from company statements and is calculated on a per ounce of gold sales basis. Interest expense has been obtained from company statements.

Reserves reflect proven and probable gold reserves (contained metal) as at 31 December 2014 obtained from company statements. Reserve life is indicative and calculated as proven and probable gold reserves (contained metal) divided by gold production for the 12 months ended 30 September 2015.

Kinross and Gold Fields' are calculated using gold equivalent production and gold equivalent reserves. All numbers have been sourced from company statements. The reserve life calculation does not take into account gold recovery rates.

Proven and probable gold reserve numbers and relevant production numbers have been adjusted to reflect Barrick’s divestment of Cowal, Porgera (50%), Spring Valley (70%), Ruby Hill (100%), Bald Mountain (100%); and Round Mountain (50%); Kinross’ acquisition of Bald Mountain (100%); and Round Mountain (50%); Newmont’s divestment of Waihi and acquisition of Cripple Creek & Victor; AngloGold’s divestment of Cripple Creek & Victor; and Goldcorp’s acquisition of remaining 30% in El Morro, and subsequent 50/50 merger of El Morro and Teck’s Relincho projects.
Forging a stronger Newcrest

Our mission
To deliver superior returns from finding, developing and operating gold/copper mines.

Our vision
To be the Miner of Choice. We will lead the way in safe, responsible, efficient and profitable mining.

Our Edge
A high performance, no-nonsense culture focused on:
- Safety
- Operational discipline
- Cash
- Profitable growth.
We deliver on our commitments.

We value...
- Caring about people
- Integrity and honesty
- Working together
- Innovation and problem solving
- High-performance

We achieve superior results through...
- Employee involvement
- Personal ownership
- Bottom-up innovation
- Operational discipline
- Shared vision
- Inspirational leaders
- Talent development
