Newcrest Mining

12 April 2016

Mine production resumed at Toguraci

Mining recommenced today at the Toguraci mine, part of the Gosowong operation.

Since the geotechnical event at Kencana on 8 February 2016, mining at Gosowong has been suspended. During the period of suspension, technical studies and rehabilitation work have been undertaken at both Toguraci and Kencana and some low grade stockpiled material has been processed.

The rate of mining at Toguraci will slowly increase over time, with full production from Toguraci not expected for at least 2 months.

Mining at Kencana remains suspended. Technical studies in relation to Kencana are well advanced but yet to be completed.

Production and cost guidance for Gosowong for the 2016 financial year will be updated after recovery and resumption plans have been completed.
